Flat Earth Society

Dear Mr. Hillman,

I have been advised by the British Council i Norway that you may have in your ward the files, correspondence and similar material of the International Flat Earth Society, now defunct.

As a free-lance journalist and radio programme maker I have started a series about Unconventional Science and, subject to the approval of the tressurers, I plan to give a programme on the Norwegian State Broadcasting on the developement of fundamentalist concepts of the world since Darwin. In a connection like that Flat Earthers must be given proper display.

To this end I take the liberty to ask you for information - written material - about: 1) highlights from the Society's history, 2) possible connections with the (very) late Alexander Dowie and Wilbur Glenn Voliva, both of the United States, 3) names and personal data on leading members and officers of the Society at the time of close-down, 4) a list of national branches round the world and 5) a comment on events that led to the desolution of the Society.

I honestly dont know why you should help med with this, unless you are a very kind person; and I have not the slightest idea what I should offer in return. Will you please drop me a line and tell me what you think?

Faithfully

Fritz Kolberg
